Date 28.04.2022

TO WHOM IT MAY CONCERN

This is to certify that Dr. Argha Sarkar, Assistant Professor in Botany, Department of Botany, Bangabasi College is a full time regular employee (substantive post) of our Institution. He has been always instrumental to carry out his scheduled academic and administrative activities with sincere efforts. It is really praise worthy and prestigious for our college that he has been requested by Dr. Ritam Chatterjee, Assistant Professor, Department of Zoology, Cooch Behar Panchanan Barma University to act as Ph.D. co-supervisor for a fellow registered with the same University.

With reference to the Governing Body resolution (Agenda No. 6 dated 23.03.2022), this is further stated that the undersigned has 'No objection' in this regard. Hope the academic activities of his department would remain uninterrupted. Wish him a great success in all his future endeavors.

Collaborative research program with Saha Institute of Nuclear Physics and Variable Energy Cyclotron Centre, Kolkata

The students of Physics Department, Bangabasi College, were specially invited by Dr. Bikash Sinha, Emeritus Scientist and former director of Saha Institute of Nuclear Physics and Variable Energy Cyclotron Centre, Kolkata, to attend a weeklong conference of “Macrocosmos, Microcosmos, Accelerator & Philosophy”, held at SINP during 9-13th May, 2022.

MACROCOSMOS, MICROCOSMOS, ACCELERATOR AND PHILOSOPHY

MMAP 2020

9th -13th May, 2022

Venue

Saha Institute of Nuclear Physics Auditorium

Bidhannagar, Kolkata-700064, India

Organised by

Tagore Centre for Natural Sciences & Philosophy

The crucial role of accelerator is to explore the microcosmos, down to quarks and gluons, the most basic and fundamental constituents of our universe, the macrocosmos. With the detection of gravitational waves, predicted by Einstein one hundred years ago, a new world of gravitational cosmology has been born along with a very novel almost revolutionary idea of the "cycle of time". When one looks at all this through the looking glass of philosophy the endless comings and goings in our world, the perpetual thirst to know and know more appear a little more sane.

Collaborative research program with Presidency University, Kolkata

The students of Bangabasi College, Physics Department, attended a Public Lecture on “The Fate of the Universe” by Dr. Somak Rouchoudhury, acclaimed astrophysicist, ex-director IUCAA and Vice-Chancellor, Ashoka University, at Presidency University, held on 9th December, 2022.

Collaborative research program with Berger Paints, Kolkata

Students of the Chemistry Department of Bangabasi College went to a daylong industrial visit at the industrial complex of Berger Paints Shalimer, Howrah West Bengal on 23 December, 2022. Application of the Berger Paints products to construction materials were presented during the visit. The students were able to gather knowledge on the use of the painting products in damp proofing, environmental protection, and home decoration. The students gained practical experience in the function of different segments of the wastewater treatment process. All efforts of the technical personnel employed by the Berger Paints authority during this industrial visit was highly appreciated.

Subject: Air Pollution Sensor Deployment Request

To,
The Principal,
Bangabasi College,
Kolkata

Dear Madam/Sir,

A group of researchers from Indian Institute of Technology, Delhi (IIT-D), is conducting a one year pollution monitoring study in Kolkata, in collaboration with St. Xaviers College. We are supported by the West Bengal Pollution Control Board. The project is funded by Environmental Defence Fund (EDF), using which low cost PM 2.5 and PM 10 units have been built in IIT Delhi. One such sensing unit, equipped with 4G SIM card for data transmission to the cloud, needs to be deployed in the premises of your esteemed institution.

Our energetic field staff Sagnik Mallik, Souvik Paul, Urmimala Paul and Swatilekha Ghosh will visit your premises to install a sensor. The height of the sensor from the ground should be 20-30 feet. It should also get good circulation of air, through a window or a grill or a veranda, so that the measured PM 2.5 and PM 10 values reflect the ambient air pollution. Each unit needs a power supply, and will draw current in the order of a mobile phone charging. Additional installation hardware, like extension chord or ropes/rods will be supplied by the field staff.

We will run a pilot study Mar-Apr 2023, to check issues with power, 4G connectivity etc. The main deployment will be Sep 2023 – Feb 2024, covering Durgapuja, Diwali, and winter season. Between Apr-Sep, the unit will be taken away from your premise and kept safely in St. Xaviers college by the field staff. All analysis reports from the collected pollution data will be shared, once the study is completed.

Around 30 institutions have agreed to be part of this deployment. The names of these institutions will be part of all reports and social media posts. We are incredibly grateful for allowing us to install a sensor in your premise, and giving us the necessary support for power supply.

Thanking you,
Yours sincerely,

Rijurekha Sen
